

REVOKED

Statement of Principles
concerning
SOFT TISSUE SARCOMA

ICD CODE: 164.1, 171

Veterans' Entitlements Act 1986
subsection 196B(3)

1. Being of the view that, on the sound medical-scientific evidence available to the Repatriation Medical Authority, it is more probable than not that **soft tissue sarcoma and death from soft tissue sarcoma** can be related to eligible war service rendered by veterans and defence service rendered by members of the Forces, the Repatriation Medical Authority determines, under subsection 196B(3) of the *Veterans' Entitlements Act 1986*, that the factors that must exist before it can be said that, on the balance of probabilities, **soft tissue sarcoma or death from soft tissue sarcoma** is connected with the circumstances of that service, are:
 - (a) in relation to Kaposi's sarcoma, being infected with HIV before the clinical onset of soft tissue sarcoma; or
 - (b) having a course of therapeutic radiation before the clinical onset of soft tissue sarcoma to the area in which the sarcoma develops;
 - (c) inability to obtain appropriate clinical management for soft tissue sarcoma.
2. Subject to clause 3 (below) at least one of the factors set out in paragraphs **1(a) to (c)** must be related to any service rendered by a person.

3. The factor set out in paragraph 1(c) applies only where:
 - (a) the person's **soft tissue sarcoma** was contracted prior to a period, or part of a period, of service to which the factor is related; and
 - (b) the relationship suggested between the **soft tissue sarcoma** and the particular service of a person is a relationship set out in paragraph 8(1)(e), 9(1)(e) or 70(5)(d) of the Act.
4. For the purposes of this Statement of Principles:

"a course" means five or more episodes of treatment within a 125 day period;

"being infected with HIV" means serological evidence of infection with human Immunodeficiency Virus, attracting an ICD code in the range 42 to 44;

"ICD code" means a number assigned to a particular kind of injury or disease in the tenth edition of the *International Classification of Diseases 9th Revision*, effective date of 1 October 1993, copyrighted by the US Commission on Professional and Hospital Activities, and having the Library of Congress number 77-94472;

"ICD morphology code" means a number assigned to the morphology of a particular neoplasm in Appendix A of the tenth edition of the *International Classification of Diseases 9th Revision*, effective date of 1 October 1993, copyrighted by the US Commission on Professional and Hospital Activities, and having the Library of Congress number 77-94472;

"Kaposi's sarcoma" means a neoplastic disorder of mesenchymal origin, with interweaving bands of spindle cells and vascular clefts or slits, attracting an ICD morphology code of M9140\3;

"soft tissue sarcoma" means a diverse group of malignant neoplasms of mesodermal origin which arise in the soft somatic tissues that occur within and between organs, attracting ICD code 164.1 or 171;

"therapeutic radiation" means electromagnetic radiation, including gamma rays, alpha particles and beta particles, deliberately applied for the purposes of medical treatment.
