

Statement of Principles
concerning
**NON FATAL EFFECTS OF ELECTRIC
SHOCK AND DEATH FROM
ELECTROCUTION**

ICD CODE: 994.8

Veterans' Entitlements Act 1986
subsection 196B(3)

1. Being of the view that, on the sound medical-scientific evidence available to the Repatriation Medical Authority, it is more probable than not that **injury from non fatal effects of electric shock and death from electrocution** can be related to eligible war service (other than operational service) rendered by veterans and defence service (other than hazardous service) rendered by members of the Forces, the Repatriation Medical Authority determines, under subsection 196B(3) of the *Veterans' Entitlements Act 1986* (the Act), that the factors that must exist before it can be said that, on the balance of probabilities, **injury from non fatal effects of electric shock and death from electrocution** is connected with the circumstances of that service, are:
 - (a) suffering or sustaining electrocution or electric shock; or
 - (b) inability to obtain appropriate clinical management for non fatal effects of electric shock.
2. Subject to clause 3 (below) at least one of the factors set out in paragraphs **1(a) to 1(b)** must be related to any service rendered by a person.

3. The factor set out in paragraph **1(b)** applies only where:
 - (a) the person's **non fatal effects of electric shock** was suffered prior to a period, or part of a period, of service to which the factor is related; and
 - (b) the relationship suggested between the **non fatal effects of electric shock** and the particular service of a person is a relationship set out in paragraph 8(1)(e), 9(1)(e), or 70(5)(d) of the Act.

4. For the purposes of this Statement of Principles:

“electric shock” means the deleterious effects to the body caused by exposure to electricity but does not include the effects of lightning, and which attracts ICD code 994.8;

“electrocution” means death by electric shock but does not include death from lightning, and which attracts ICD code 994.8;

“ICD code” means a number assigned to a particular kind of injury or disease in the tenth edition of the *International Classification of Diseases* 9th Revision, effective date of 1 October 1993, copyrighted by the US Commission on Professional and Hospital Activities, and having the Library of Congress number 77-94472.

Dated this *Thirteenth* day of *April* 1995
