1. This is the Explanatory Statement to the Statement of Principles concerning dislocation of a joint and subluxation of a joint (Balance of Probabilities) (No. 56 of 2019).

Background

2. The Repatriation Medical Authority (the Authority), under subsection 196B(8) of the Veterans' Entitlements Act 1986 (the VEA), repeals Instrument No. 25 of 2010 (Federal Register of Legislation No. F2010L01041) determined under subsection 196B(3) of the VEA concerning dislocation.

3. The Authority is of the view that on the sound medical-scientific evidence available it is more probable than not that dislocation of a joint and subluxation of a joint and death from dislocation of a joint and subluxation of a joint can be related to particular kinds of service. The Authority has therefore determined pursuant to subsection 196B(3) of the VEA a Statement of Principles concerning dislocation of a joint and subluxation of a joint (Balance of Probabilities) (No. 56 of 2019). This Instrument will in effect replace the repealed Statement of Principles.

Purpose and Operation

4. The Statement of Principles will be applied in determining claims under the VEA and the Military Rehabilitation and Compensation Act 2004 (the MRCA).

5. The Statement of Principles sets out the factors that must exist, and which of those factors must be related to the following kinds of service rendered by a person:
   - eligible war service (other than operational service) under the VEA;
   - defence service (other than hazardous service and British nuclear test defence service) under the VEA;
   - peacetime service under the MRCA,

before it can be said that, on the balance of probabilities, dislocation of a joint and subluxation of a joint or death from dislocation of a joint and subluxation of a joint is connected with the circumstances of that service. The Statement of Principles has been determined for the purposes of both the VEA and the MRCA.

6. This Instrument results from an investigation notified by the Authority in the Government Notices Gazette of 14 November 2017 concerning dislocation in accordance with section 196G of the VEA. The investigation involved an examination...
of the sound medical-scientific evidence now available to the Authority, including the sound medical-scientific evidence it has previously considered.

7. The contents of this Instrument are in similar terms as the repealed Instrument. Comparing this Instrument and the repealed Instrument, the differences include:

- adopting the latest revised Instrument format, which commenced in 2015;
- specifying a day of commencement for the Instrument in section 2;
- changing the title of the Instrument to 'dislocation of a joint and subluxation of a joint';
- new definition of 'dislocation of a joint and subluxation of a joint' in subsection 7(2);
- removing the reference to 'ICD-10-AM code';
- revising the factor in subsection 9(1) concerning 'physical trauma to the affected joint';
- revising the factor in subsection 9(2) concerning 'damage to a soft tissue structure';
- revising the factor in subsection 9(3) concerning 'fracture, avulsion or bony abnormality involving the articulating surfaces';
- revising the factor in subsection 9(4) concerning 'disease process as specified affecting the normal structural or functional relationship between the articulating surfaces of the affected joint';
- revising the factor in subsection 9(5) concerning 'undertaking an activity or undergoing a medical procedure that involves wide opening of the mouth', for dislocation of a temporomandibular joint or subluxation of a temporomandibular joint only;
- new factor in subsection 9(6) concerning 'being severely obese', for dislocation of a tibiofemoral joint or subluxation of a tibiofemoral joint only;
- new factor in subsection 9(7)(a) concerning 'being obese', for dislocation of a total hip joint prosthesis only;
- new factor in subsection 9(7)(b) concerning 'lumbar spondylosis, lumbar intervertebral disc prolapse, lumbar spondylolisthesis, lumbar spinal stenosis or lumbar spinal fusion', for dislocation of a total hip joint prosthesis only;
- deleting the factors concerning 'having an inflammatory or infectious condition involving the ear, nose or throat' and 'having undergone a surgical procedure involving the head or neck' as these are now covered by the factor in subsection 9(4) concerning 'disease process as specified affecting the normal structural or functional relationship between the articulating surfaces of the affected joint';
- deleting the factors concerning 'tracheal intubation' and 'intravenous sedation' as these are now covered by the factor in subsection 9(5) concerning 'undertaking an activity or undergoing a medical procedure that involves wide opening of the mouth', for dislocation of a temporomandibular joint or subluxation of a temporomandibular joint only;
- deleting the factor concerning 'laxity of the joint capsule or a stabilising ligament of the affected joint';
- deleting the factor concerning 'biomechanical abnormality';
- new definitions of 'being obese', 'BMI', 'disease process as specified', 'MRCA' and 'VEA' in Schedule 1 - Dictionary;
- revising the definitions of 'relevant service' and 'soft tissue structure as specified' in Schedule 1 - Dictionary; and
• deleting the definitions of 'a biomechanical abnormality involving the affected joint', 'a disease process affecting the normal structural or functional relationship between the articulating surfaces of the affected joint', 'an activity that involves wide opening of the mouth', 'neuropathic arthropathy' and 'physical trauma to the affected joint'.

Consultation

8. Prior to determining this Instrument, the Authority advertised its intention to undertake an investigation in relation to dislocation in the Government Notices Gazette of 14 November 2017, and circulated a copy of the notice of intention to investigate to a wide range of organisations representing veterans, service personnel and their dependants. The Authority invited submissions from the Repatriation Commission, organisations and persons referred to in section 196E of the VEA, and any person having expertise in the field. No submissions were received for consideration by the Authority during the investigation.

9. On 11 October 2018, the Authority wrote to organisations representing veterans, service personnel and their dependants regarding the proposed Instrument and the medical-scientific material considered by the Authority. This letter emphasised the deletion of factors relating to laxity of the joint capsule or a stabilising ligament and biomechanical abnormality. The Authority provided an opportunity to the organisations to make representations in relation to the proposed Instrument prior to its determination. No submissions were received for consideration by the Authority. Minor typographical changes were made to the proposed Instrument following this consultation process.

Human Rights

10. This instrument is compatible with the Human Rights and Freedoms recognised or declared in the International Instruments listed in Section 3 of the Human Rights (Parliamentary Scrutiny) Act 2011. A Statement of Compatibility with Human Rights follows.

Finalisation of Investigation

Statement of Compatibility with Human Rights

(Prepared in accordance with Part 3 of the Human Rights (Parliamentary Scrutiny) Act 2011)

Instrument No.: Statement of Principles No. 56 of 2019
Kind of Injury, Disease or Death: Dislocation of a joint and subluxation of a joint

This Legislative Instrument is compatible with the human rights and freedoms recognised or declared in the international instruments listed in section 3 of the Human Rights (Parliamentary Scrutiny) Act 2011.

Overview of the Legislative Instrument

1. This Legislative Instrument is determined pursuant to subsection 196B(8) of the Veterans' Entitlements Act 1986 (the VEA) for the purposes of the VEA and the Military Rehabilitation and Compensation Act 2004 (the MRCA). Part XIA of the VEA requires the determination of these instruments outlining the factors linking particular kinds of injury, disease or death with service such being determined solely on the available sound medical-scientific evidence.

2. This Legislative Instrument:-
   - facilitates claimants in making, and the Repatriation Commission in assessing, claims under the VEA and the MRCA respectively, by specifying the circumstances in which medical treatment and compensation can be extended to eligible persons who have dislocation of a joint or subluxation of a joint;
   - facilitates the review of such decisions by the Veterans' Review Board and the Administrative Appeals Tribunal;
   - outlines the factors which the current sound medical-scientific evidence indicates must exist before it can be said that, on the balance of probabilities, dislocation of a joint and subluxation of a joint is connected with the circumstances of eligible service rendered by a person, as set out in clause 5 of the Explanatory Statement;
   - replaces Instrument No. 25 of 2010; and
   - reflects developments in the available sound medical-scientific evidence concerning dislocation of a joint and subluxation of a joint which have occurred since that earlier instrument was determined.

3. The Instrument is assessed as being a technical instrument which improves the medico-scientific quality of outcomes under the VEA and the MRCA.
Human Rights Implications

4. This Legislative Instrument does not derogate from any human rights. It promotes the human rights of veterans, current and former Defence Force members as well as other persons such as their dependents, including:

- the right to social security (Art 9, *International Covenant on Economic, Social and Cultural Rights*; Art 26, *Convention on the Rights of the Child* and Art 28, *Convention on the Rights of Persons with Disabilities*) by helping to ensure that the qualifying conditions for the benefit are 'reasonable, proportionate and transparent'\(^1\);
- the right to an adequate standard of living (Art 11, ICSECR; Art 27, CRC and Art 28, CRPD) by facilitating the assessment and determination of social security benefits;
- the right to the enjoyment of the highest attainable standard of physical and mental health (Art 12, ICSECR and Art 25, CRPD), by facilitating the assessment and determination of compensation and benefits in relation to the treatment and rehabilitation of veterans and Defence Force members;
- the rights of persons with disabilities by facilitating the determination of claims relating to treatment and rehabilitation (Art 26, CRPD); and
- ensuring that those rights "will be exercised without discrimination of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status" (Art 2, ICESCR).

Conclusion

This Legislative Instrument is compatible with human rights as it does not derogate from and promotes a number of human rights.

Repatriation Medical Authority

---

\(^1\) In General Comment No. 19 (The right to social security), the Committee on Economic, Social and Cultural Rights said (at paragraph 24) this to be one of the elements of ensuring accessibility to social security.
