Statement of Principles

concerning

ALZHEIMER'S DISEASE

ICD CODE: 331.0

Veterans’ Entitlements Act 1986
subsection 196B(3)

1. Being of the view that on the sound medical-scientific evidence available to the Repatriation Medical Authority, it is more probable than not that Alzheimer's disease and death from Alzheimer's disease can be related to eligible war service (other than operational service) rendered by veterans and defence service (other than hazardous service) rendered by members of the Forces, the Repatriation Medical Authority determines, under subsection 196B(3) of the Veterans’ Entitlements Act 1986 (the Act), that the factor that must exist before it can be said that, on the balance of probabilities, Alzheimer's disease or death from Alzheimer's disease is connected with the circumstances of that service, is:

   (a) inability to obtain appropriate clinical management for Alzheimer's disease.

2. Subject to clause 3 (below) the factor set out in paragraph 1(a) must be related to any service rendered by a person.

3. The factor set out in paragraph 1(a) applies only where:

   (a) the person's Alzheimer's disease was suffered before a period, or part of a period, of service to which the factor is related; and
(b) the relationship suggested between the Alzheimer's disease and the particular service of a person is a relationship set out in paragraph 8(1)(e), 9(1)(e) or 70(5)(d) of the Act.

4. For the purposes of this Statement of Principles:

“Alzheimer's disease” means a dementia that is characterised histopathologically by an abundance of neurofibrillary tangles and senile (neuritic) plaques in limbic structures, the cerebral cortex and certain subcortical nuclei; with a slowly progressive deterioration in memory and other cognitive functions, attracting ICD code 331.0;

“ICD code” means a number assigned to a particular kind of injury or disease in the Australian Version of The International Classification of Diseases, 9th revision, Clinical Modification (ICD-9-CM), effective date of 1 July 1995, copyrighted by the National Coding Centre, Faculty of Health Sciences, University of Sydney, NSW, and having ISBN 0 642 22235 5.

Dated this Twenty-third day of November 1995

The Common Seal of the Repatriation Medical Authority was affixed to this instrument in the presence of:

KEN DONALD
