1. The Repatriation Medical Authority under subsection 196B(3) of the Veterans’ Entitlements Act 1986 (the Act):

(a) revokes Instrument No.2 of 1995; and

(b) determines the following Statement of Principles.

Kind of injury, disease or death

2. (a) This Statement of Principles is about multiple myeloma and death from multiple myeloma.

(b) For the purposes of this Statement of Principles, “multiple myeloma” means a disseminated plasma cell neoplasm of the osseous system, attracting ICD code 203.0, associated with widespread lesions of the skeletal system, hyperglobulinaemia, Bence-Jones proteinuria and normochromic, normocytic anaemia, and also includes the conditions known as myelomatosis and plasma cell myeloma.

Basis for determining the factors

3. On the sound medical-scientific evidence available, the Repatriation Medical Authority is of the view that it is more probable than not that multiple myeloma and death from multiple myeloma can be related to relevant service rendered by veterans or members of the Forces.
Factors that must be related to service
4. Subject to clause 6, the factors set out in at least one of the paragraphs in clause 5 must be related to any relevant service rendered by the person.

Factors
5. The factors that must exist before it can be said that, on the balance of probabilities, multiple myeloma or death from multiple myeloma is connected with the circumstances of a person’s relevant service are:

(a) being occupationally required to work as a painter for an average of three or more days per week over any five year period, (or working as a painter for a period or periods of time totalling at least 782 days) before the clinical onset of multiple myeloma, and where that occupational exposure has ceased, the clinical onset of multiple myeloma has occurred within ten years of cessation; or

(b) inability to obtain appropriate clinical management for multiple myeloma.

Factors that apply only to material contribution or aggravation
6. Paragraph 5(b) applies only to material contribution to, or aggravation of, multiple myeloma where the person’s multiple myeloma was suffered or contracted before or during (but not arising out of) the person’s relevant service; paragraph 8(1)(e), 9(1)(e) or 70(5)(d) of the Act refers.

Other definitions
7. For the purposes of this Statement of Principles:

“ICD code” means a number assigned to a particular kind of injury or disease in the Australian Version of The International Classification of Diseases, 9th revision, Clinical Modification (ICD-9-CM), effective date of 1 July 1996, copyrighted by the National Coding Centre, Faculty of Health Sciences, University of Sydney, NSW, and having ISBN 0 642 24447 2;

“relevant service” means:

(a) eligible war service (other than operational service); or

(b) defence service (other than hazardous service).
Application

8. This Instrument applies to all matters to which section 120B of the Act applies.

Dated this Twenty-sixth day of September 1996

The Common Seal of the Repatriation Medical Authority was affixed to this instrument in the presence of:

KEN DONALD
CHAIRMAN
