Determination

of

Statement of Principles

concerning

MALIGNANT NEOPLASM OF THE THYROID GLAND

ICD CODE: 193

Veterans' Entitlements Act 1986

1. This Statement of Principles is determined by the Repatriation Medical Authority under subsection **196B(3)** of the *Veterans' Entitlements Act 1986* (the Act).

Kind of injury, disease or death

2. (a) This Statement of Principles is about **malignant neoplasm of the thyroid gland** and **death from malignant neoplasm of the thyroid gland**.

(b) For the purposes of this Statement of Principles, “**malignant neoplasm of the thyroid gland**” means a primary malignant neoplasm arising from the cells of the thyroid gland, attracting ICD code 193.

Note: For the purposes of this Statement of Principles, this definition specifically excludes soft tissue sarcoma, non-Hodgkin's lymphoma and Hodgkin's disease.

Note to user (this note does not form part of the legal wording of the instrument):

In the event that a disease referred to in the note above (which is excluded from coverage by this Statement of Principles) is claimed, reference should be made to the relevant Statement of Principles (or Statements of Principles) which cover or refer to that disease (if any).

Basis for determining the factors

3. On the sound medical-scientific evidence available, the Repatriation Medical Authority is of the view that it is more probable than not that **malignant neoplasm of the thyroid gland and death from malignant neoplasm of the thyroid gland** can be related to relevant service rendered by veterans or members of the Forces.

Factors that must be related to service

4. Subject to clause 6, the factors set out in at least one of the paragraphs in clause 5 must be related to any relevant service rendered by the person.

Factors

5. The factors that must exist before it can be said that, on the balance of probabilities, **malignant neoplasm of the thyroid gland** or **death from malignant neoplasm of the thyroid gland** is connected with the circumstances of a person's relevant service are:
 - (a) for papillary, follicular, medullary, and anaplastic thyroid carcinomas only,
 - (i) undergoing a course of therapeutic radiation to the head or neck region before the clinical onset of malignant neoplasm of the thyroid gland, where the first exposure occurred at least five years before the clinical onset of malignant neoplasm of the thyroid gland; or
 - (ii) suffering from a thyroid adenoma before the clinical onset of malignant neoplasm of the thyroid gland; or
 - (iii) suffering from a goitre before the clinical onset of malignant neoplasm of the thyroid gland; or
 - (b) inability to obtain appropriate clinical management for malignant neoplasm of the thyroid gland.

Factors that apply only to material contribution or aggravation

6. Paragraph 5(b) applies only to material contribution to, or aggravation of, malignant neoplasm of the thyroid gland where the person's malignant neoplasm of the thyroid gland was suffered or contracted before or during (but not arising out of) the person's relevant service; paragraph 8(1)(e), 9(1)(e) or 70(5)(d) of the Act refers.

Other definitions

7. For the purposes of this Statement of Principles:

“a course of therapeutic radiation” means one or more fractions (treatment portions) of ionising radiation administered with the aim of achieving palliation or cure with gamma rays, x-rays, alpha particles or beta particles;

“goitre” means an enlargement of the thyroid gland, typically causing swelling in the front part of the neck, attracting ICD codes 240, 241, 242.0, 242.1, 242.2, or 242.3;

“ICD code” means a number assigned to a particular kind of injury or disease in the Australian Version of The International Classification of Diseases, 9th revision, Clinical Modification (ICD-9-CM), effective date of 1 July 1996, copyrighted by the National Coding Centre, Faculty of Health Sciences, University of Sydney, NSW, and having ISBN 0 642 24447 2;

“relevant service” means:

- (a) eligible war service (other than operational service); or
- (b) defence service (other than hazardous service);

“thyroid adenoma” means a benign epithelial tumour of the thyroid in which the cells form recognisable glandular structures or in which cells are clearly derived from glandular epithelium, attracting ICD code 226.
