1. omitting paragraph 2(b), and replacing it with the following:

“(b) For the purposes of this Statement of Principles, **“intervertebral disc prolapse”** means protrusion, herniation or rupture of an intervertebral disc of the cervical, thoracic or lumbar spine, causing local pain and stiffness, and may include:

and altered mobility or altered range of movement of that part of the spine, which persists for at least two weeks, unless medical intervention has occurred (for example bracing, corticosteroid injection, surgery). Where medical intervention for the injury has occurred, and there is evidence relating to the extent of injury and treatment, such evidence may be considered. Examples of activities or events that may result in trauma to the relevant disc include:

- (i) lifting, pushing or pulling an object weighing more than 10 kg; or
- (ii) jumping from a height, for example, in a parachute jump, or jumping down from a tank; or
- (iii) a fall; or

- (v) participating in sports, for example, football, surfing, gymnastics; or
- (vi) spinal manipulation; or
- (vii) a motor vehicle accident; or
- (viii) a blast explosion; or
- (ix) a physical attack.”.
