Statement of Principles

concerning

HUMAN IMMUNODEFICIENCY VIRUS INFECTION
(Reasonable Hypothesis)
(No. 5 of 2019)

The Repatriation Medical Authority determines the following Statement of Principles under subsection 196B(2) of the Veterans' Entitlements Act 1986.

Dated 21 December 2018

The Common Seal of the Repatriation Medical Authority was affixed to this instrument at the direction of:

Professor Nicholas Saunders AO
Chairperson

1. Definitions ..................................................................................................................... 6
1 Name
This is the Statement of Principles concerning human immunodeficiency virus infection (Reasonable Hypothesis) (No. 5 of 2019).

2 Commencement
This instrument commences on 28 January 2019.

3 Authority
This instrument is made under subsection 196B(2) of the Veterans' Entitlements Act 1986.

4 Repeal
The Statement of Principles concerning human immunodeficiency virus No. 5 of 2010 (Federal Register of Legislation No. F2010L00012) made under subsection 196B(2) of the VEA is repealed.

5 Application
This instrument applies to a claim to which section 120A of the VEA or section 338 of the Military Rehabilitation and Compensation Act 2004 applies.

6 Definitions
The terms defined in the Schedule 1 - Dictionary have the meaning given when used in this instrument.

7 Kind of injury, disease or death to which this Statement of Principles relates
(1) This Statement of Principles is about human immunodeficiency virus infection and death from human immunodeficiency virus infection.

Meaning of human immunodeficiency virus infection
(2) For the purposes of this Statement of Principles, human immunodeficiency virus infection means an infection that is caused by one of the human retroviruses, human immunodeficiency virus-1 (HIV-1) or human immunodeficiency virus-2 (HIV-2).

(3) While human immunodeficiency virus infection attracts ICD-10-AM code B20, B21, B22, B23, B24 or Z21, in applying this Statement of Principles the meaning of human immunodeficiency virus infection is that given in subsection (2).

(4) For subsection (3), a reference to an ICD-10-AM code is a reference to the code assigned to a particular kind of injury or disease in The International Statistical Classification of Diseases and Related Health
Death from human immunodeficiency virus infection

(5) For the purposes of this Statement of Principles, human immunodeficiency virus infection, in relation to a person, includes death from a terminal event or condition that was contributed to by the person's human immunodeficiency virus infection.

Note: terminal event is defined in the Schedule 1 – Dictionary.

8 Basis for determining the factors

The Repatriation Medical Authority is of the view that there is sound medical-scientific evidence that indicates that human immunodeficiency virus infection and death from human immunodeficiency virus infection can be related to relevant service rendered by veterans, members of Peacekeeping Forces, or members of the Forces under the VEA, or members under the MRCA.

Note: MRCA, relevant service and VEA are defined in the Schedule 1 – Dictionary.

9 Factors that must exist

At least one of the following factors must as a minimum exist before it can be said that a reasonable hypothesis has been raised connecting human immunodeficiency virus infection or death from human immunodeficiency virus infection with the circumstances of a person's relevant service:

(1) being exposed to HIV-1 or HIV-2 before the clinical onset of human immunodeficiency virus infection;

Note: being exposed to HIV-1 or HIV-2 is defined in the Schedule 1 - Dictionary.

(2) having:
   (a) a genital ulcerative disease; or
   (b) a non-ulcerative anogenital sexually transmitted infection with clinical symptoms or signs, excluding genital warts; or
   (c) herpes simplex virus type 2 anogenital infection;

   within the 30 days before the clinical onset of human immunodeficiency virus infection;

(3) using depot medroxyprogesterone acetate contraception at the time of the clinical onset of human immunodeficiency virus infection;

(4) having an infection from the specified list of infections at the time of the clinical worsening of human immunodeficiency virus infection;

Note: specified list of infections is defined in the Schedule 1 - Dictionary.
(5) inability to obtain appropriate clinical management for human immunodeficiency virus infection.

10 **Relationship to service**

(1) The existence in a person of any factor referred to in section 9, must be related to the relevant service rendered by the person.

(2) The factors set out in subsections 9(4) and 9(5) apply only to material contribution to, or aggravation of, human immunodeficiency virus infection where the person's human immunodeficiency virus infection was suffered or contracted before or during (but did not arise out of) the person's relevant service.

11 **Factors referring to an injury or disease covered by another Statement of Principles**

In this Statement of Principles:

(1) if a factor referred to in section 9 applies in relation to a person; and

(2) that factor refers to an injury or disease in respect of which a Statement of Principles has been determined under subsection 196B(2) of the VEA;

then the factors in that Statement of Principles apply in accordance with the terms of that Statement of Principles as in force from time to time.
Schedule 1 - Dictionary
Note: See Section 6

1 Definitions

In this instrument:

**being exposed to HIV-1 or HIV-2** means:

(a) having percutaneous exposure (intravenous, intramuscular, subcutaneous or intradermal) or permucosal exposure to a specified body substance which is derived from a person infected with HIV-1 or HIV-2; or

(b) having a tissue or organ transplant, where the tissue or organ is derived from a person infected with HIV-1 or HIV-2.

Note: **specified body substance** is also defined in the Schedule 1 – Dictionary.

**helminthic infection** means soil-transmitted helminths, schistosomiasis, onchocerciasis, lymphatic filariasis, and visceral and cutaneous leishmaniasis.

**human immunodeficiency virus infection**—see subsection 7(2).

**MRCA** means the *Military Rehabilitation and Compensation Act 2004*.

**relevant service** means:

(a) operational service under the VEA;
(b) peacekeeping service under the VEA;
(c) hazardous service under the VEA;
(d) British nuclear test defence service under the VEA;
(e) warlike service under the MRCA; or
(f) non-warlike service under the MRCA.

Note: **MRCA** and **VEA** are also defined in the Schedule 1 - Dictionary.

**specified body substance** means:

(a) blood, blood products or any body fluid containing blood; or
(b) semen or vaginal secretions.

**specified list of infections** means:

(a) helminthic infection;
(b) herpes simplex virus type 2;
(c) human T-cell lymphotropic virus type-1;
(d) malaria; or
(e) tuberculosis.

Note: **helminthic infection** is also defined in the Schedule 1 – Dictionary.

**terminal event** means the proximate or ultimate cause of death and includes the following:

(a) pneumonia;
(b) respiratory failure;
(c) cardiac arrest.
Schedule 1 - Dictionary

(d) circulatory failure; or
(e) cessation of brain function.

VEA means the Veterans’ Entitlements Act 1986.
