

Australian Government
Repatriation Medical Authority

EXPLANATORY STATEMENT

**STATEMENT OF PRINCIPLES CONCERNING
ERECTILE DYSFUNCTION
(REASONABLE HYPOTHESIS) (No. 72 of 2022)**

VETERANS' ENTITLEMENTS ACT 1986
MILITARY REHABILITATION AND COMPENSATION ACT 2004

1. This is the Explanatory Statement to the *Statement of Principles concerning erectile dysfunction (Reasonable Hypothesis)* (No. 72 of 2022).

Background

2. The Repatriation Medical Authority (the Authority), under subsection 196B(8) of the *Veterans' Entitlements Act 1986* (the VEA), repeals Instrument No. 43 of 2013 (Federal Register of Legislation No.F2013L01136) determined under subsections 196B(2) and (8) of the VEA concerning **erectile dysfunction**.
3. The Authority is of the view that there is sound medical-scientific evidence that indicates that **erectile dysfunction** and **death from erectile dysfunction** can be related to particular kinds of service. The Authority has therefore determined pursuant to subsection 196B(2) of the VEA a Statement of Principles concerning **erectile dysfunction** (Reasonable Hypothesis) (No. 72 of 2022). This Instrument will in effect replace the repealed Statement of Principles.

Purpose and Operation

4. The Statement of Principles will be applied in determining claims under the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA).
5. The Statement of Principles sets out the factors that must as a minimum exist, and which of those factors must be related to the following kinds of service rendered by a person:

- operational service under the VEA;
- peacekeeping service under the VEA;
- hazardous service under the VEA;
- British nuclear test defence service under the VEA;
- warlike service under the MRCA;
- non-warlike service under the MRCA,

before it can be said that a reasonable hypothesis has been raised connecting **erectile dysfunction** or death from **erectile dysfunction**, with the circumstances of that service. The Statement of Principles has been determined for the purposes of both the VEA and the MRCA.

6. This Instrument results from an investigation notified by the Authority in the Government Notices Gazette of 5 January 2021 concerning **erectile dysfunction** in

accordance with section 196G of the VEA. The investigation involved an examination of the sound medical-scientific evidence now available to the Authority, including the sound medical-scientific evidence it has previously considered.

7. The contents of this Instrument are in similar terms as the repealed Instrument. Comparing this Instrument and the repealed Instrument, the differences include:
- adopting the latest revised Instrument format, which commenced in 2015;
 - specifying a day of commencement for the Instrument in section 2;
 - revising the definition of 'erectile dysfunction' in subsection 7(2);
 - including ICD-10-AM codes for 'erectile dysfunction' in subsection 7(3);
 - revising the factors in subsections 9(1) and 9(26) concerning having a clinically significant disorder of mental health;
 - new factors in subsections 9(2) and 9(27) concerning having cardiovascular disease;
 - revising the factors in subsections 9(3) and 9(28) concerning having a medical condition;
 - new factors in subsections 9(4) and 9(29) concerning having an autoimmune disease;
 - revising the factors in subsections 9(5) and 9(30) concerning having an endocrine disorder;
 - revising the factors in subsections 9(6) and 9(31) concerning having a neurological disorder;
 - revising the factors in subsections 9(7) and 9(32) concerning having a urological condition;
 - new factors in subsection 9(8) and 9(33) concerning having an infection;
 - new factors in subsections 9(9) and 9(34) concerning having herpes zoster;
 - revising the factors in subsections 9(10) and 9(35) concerning having hypertension;
 - revising the factors in subsections 9(11) and 9(36) concerning having chronic renal failure;
 - deleting the factors concerning having a renal transplantation;
 - revising the factors in subsections 9(12) and 9(37) concerning having Peyronie disease;
 - new factors in subsections 9(13) and 9(38) concerning having hidradenitis suppurativa;
 - revising the factors in subsections 9(14) and 9(39) concerning having ischaemic priapism, by the inclusion of a note;
 - revising the factors in subsections 9(15) and 9(40) concerning having a surgical operation;
 - revising the factors in subsections 9(16) and 9(41) concerning having a trauma or surgery;
 - revising the factors in subsections 9(17) and 9(42) concerning having blunt trauma;
 - new factors in subsection 9(18) and 9(43) concerning having internal burns, substantial external burns, or electrical injury;
 - revising the factors in subsections 9(19) and 9(44) concerning having smoked tobacco products;
 - revising the factors in subsections 9(20) and 9(45) concerning undergoing a course of therapeutic radiation for cancer;

- deleting the factors concerning having received a cumulative equivalent dose of ionising radiation as these are now covered by the factors in subsections 9(20) and 9(45);
- revising the factors in subsections 9(21) and 9(46) concerning being obese, by the inclusion of a note;
- revising the factors in subsections 9(22) and 9(47) concerning taking a drug specified in the Schedule 2 – Drugs;
- new factors in subsections 9(23) and 9(48) concerning inhaling, ingesting or having cutaneous contact with carbon disulphide;
- revising the factors in subsections 9(24) and 9(49) concerning inability to undertake any physical activity greater than 3 METs, by the inclusion of a note;
- new factor in subsections 9(25) concerning experiencing childhood sexual abuse before clinical onset.
- new definitions of 'active migraine', 'blunt trauma', 'BMI', 'chronic renal failure', 'clinically significant disorder of mental health as specified', 'DSM-5-TR', 'MRCA', 'obstructive sleep apnoea', 'one pack-year', 'severe alcohol use disorder', 'specified list of autoimmune diseases', 'specified list of cardiovascular diseases', 'specified list of endocrine disorders', 'specified list of infections', 'specified list of medical conditions' 'specified list of neurological disorders', 'specified list of surgical operations', 'specified list of urological conditions', 'substantial external burns' and 'VEA' in Schedule 1 - Dictionary;
- revising the definitions of 'acromegaly' 'being obese', 'Peyronie disease', and 'relevant service' in Schedule 1 –Dictionary;
- deleting the definitions of 'a clinically significant psychiatric disorder from the specified list', 'a condition from the specified list which causes lower urinary tract symptoms', 'a drug or a drug from a class of drugs from the specified list', 'a specified endocrinological disorder', 'a specified medical condition', 'a specified neurological disorder', 'blunt or penetrating trauma', 'cumulative equivalent dose', 'malignant neoplasm of the reproductive organs' and 'pack years of cigarettes, or the equivalent thereof in other tobacco products'
- new table of specified drugs in Schedule 2 – Drugs.

Consultation

8. Prior to determining this Instrument, the Authority advertised its intention to undertake an investigation in relation to erectile dysfunction in the Government Notices Gazette of 5 January 2021, and circulated a copy of the notice of intention to investigate to a wide range of organisations representing veterans, service personnel and their dependants. The Authority invited submissions from the Repatriation Commission, the Military Rehabilitation and Compensation Commission, organisations and persons referred to in section 196E of the VEA, and any person having expertise in the field. No submissions were received for consideration by the Authority in relation to the investigation.
9. On 1 February 2022, the Authority wrote to organisations representing veterans, service personnel and their dependants regarding the proposed Instrument and the medical-scientific material considered by the Authority. This letter emphasised the deletion of factors relating to renal transplantation. The Authority provided an opportunity to the organisations to make representations in relation to the proposed Instrument prior to its determination. No submissions were received for consideration by the Authority. The only change made to the proposed Instrument following this

consultation process was that the reference to ‘DSM-5’ was updated to ‘DSM-5-TR’ and a definition of DSM-5-TR was included in the Schedule 1 - Dictionary.

Human Rights

10. This instrument is compatible with the Human Rights and Freedoms recognised or declared in the International Instruments listed in Section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*. A Statement of Compatibility with Human Rights follows.

Finalisation of Investigation

11. The determining of this Instrument finalises the investigation in relation to **erectile dysfunction** as advertised in the Government Notices Gazette of 5 January 2021.

Statement of Compatibility with Human Rights

(Prepared in accordance with Part 3 of the Human Rights (Parliamentary Scrutiny) Act 2011)

Instrument No.: **Statement of Principles No. 72 of 2022**

Kind of Injury, Disease or Death: **Erectile dysfunction**

This Legislative Instrument is compatible with the human rights and freedoms recognised or declared in the international instruments listed in section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*.

Overview of the Legislative Instrument

1. This Legislative Instrument is determined pursuant to subsection 196B(2) of the *Veterans' Entitlements Act 1986* (the VEA) for the purposes of the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA). Part XIA of the VEA requires the determination of these instruments outlining the factors connecting particular kinds of injury, disease or death with service such being determined solely on the available sound medical-scientific evidence.
2. This Legislative Instrument:-
 - facilitates claimants in making, and the Repatriation Commission and the Military Rehabilitation and Compensation Commission in assessing, claims under the VEA and the MRCA respectively, by specifying the circumstances in which medical treatment and compensation can be extended to eligible persons who have erectile dysfunction;
 - facilitates the review of such decisions by the Veterans' Review Board and the Administrative Appeals Tribunal;
 - outlines the factors which the current sound medical-scientific evidence indicates must as a minimum exist, before it can be said that a reasonable hypothesis has been raised, connecting erectile dysfunction with the circumstances of eligible service rendered by a person, as set out in clause 5 of the Explanatory Statement;
 - replaces Instrument No. 43 of 2013; and
 - reflects developments in the available sound medical-scientific evidence concerning erectile dysfunction which have occurred since that earlier instrument was determined.
3. The Instrument is assessed as being a technical instrument which improves the medico-scientific quality of outcomes under the VEA and the MRCA.

Human Rights Implications

4. This Legislative Instrument does not derogate from any human rights. It promotes the human rights of veterans, current and former Defence Force members as well as other persons such as their dependents, including:
- the right to social security (Art 9, *International Covenant on Economic, Social and Cultural Rights*; Art 26, *Convention on the Rights of the Child* and Art 28, *Convention on the Rights of Persons with Disabilities*) by helping to ensure that the qualifying conditions for the benefit are 'reasonable, proportionate and transparent'¹;
 - the right to an adequate standard of living (Art 11, ICESCR; Art 27, CRC and Art 28, CRPD) by facilitating the assessment and determination of social security benefits;
 - the right to the enjoyment of the highest attainable standard of physical and mental health (Art 12, ICESCR and Art 25, CRPD), by facilitating the assessment and determination of compensation and benefits in relation to the treatment and rehabilitation of veterans and Defence Force members;
 - the rights of persons with disabilities by facilitating the determination of claims relating to treatment and rehabilitation (Art 26, CRPD); and
 - ensuring that those rights "will be exercised without discrimination of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status" (Art 2, ICESCR).

Conclusion

This Legislative Instrument is compatible with human rights as it does not derogate from and promotes a number of human rights.

Repatriation Medical Authority

¹ In General Comment No. 19 (The right to social security), the Committee on Economic, Social and Cultural Rights said (at paragraph 24) this to be one of the elements of ensuring accessibility to social security.
