

Revocation

of

Statement of Principles
concerning

VARICOSE VEINS

and

Determination

of

Statement of Principles
concerning

VARICOSE VEINS OF THE LOWER LIMB

ICD-9-CM CODE: 454

Veterans' Entitlements Act 1986

1. The Repatriation Medical Authority under subsection **196B(3)** of the *Veterans' Entitlements Act 1986* (the Act):
 - (a) revokes Instrument No.4 of 1995 (Statement of Principles concerning varicose veins); and
 - (b) determines in its place the following Statement of Principles.

Kind of injury, disease or death

2. (a) This Statement of Principles is about **varicose veins of the lower limb** and **death from varicose veins of the lower limb**.

- (b) For the purposes of this Statement of Principles, “**varicose veins of the lower limb**” means dilatation, lengthening and tortuosity of a subcutaneous superficial vein or veins of the lower limb such as the saphenous veins and perforating veins and does not include telangiectasis (intradermal venectasis), attracting ICD-9-CM code 454.

Basis for determining the factors

- 3. On the sound medical-scientific evidence available, the Repatriation Medical Authority is of the view that it is more probable than not that **varicose veins of the lower limb and death from varicose veins of the lower limb** can be related to relevant service rendered by veterans or members of the Forces.

Factors that must be related to service

- 4. Subject to clause 6, at least one of the factors set out in clause 5 must be related to any relevant service rendered by the person.

Factors

- 5. The factors that must exist before it can be said that, on the balance of probabilities, **varicose veins of the lower limb** or **death from varicose veins of the lower limb** is connected with the circumstances of a person’s relevant service are:
 - (a) suffering from thrombosis of a deep vein draining the affected lower limb before the clinical onset of varicose veins of the lower limb; or
 - (b) suffering complete or partial obstruction of a vein draining the affected lower limb at the time of the clinical onset of varicose veins of the lower limb; or
 - (c) being pregnant at the time of the clinical onset of varicose veins of the lower limb; or
 - (d) having an acquired arteriovenous fistula involving the blood vessels supplying the affected lower limb at the time of the clinical onset of varicose veins of the lower limb; or
 - (e) suffering from thrombosis of a deep vein draining the affected lower limb before the clinical worsening of varicose veins of the lower limb; or

- (f) suffering complete or partial obstruction of a vein draining the affected lower limb at the time of the clinical worsening of varicose veins of the lower limb; or
- (g) being pregnant at the time of the clinical worsening of varicose veins of the lower limb; or
- (h) having an acquired arteriovenous fistula involving the blood vessels supplying the affected lower limb at the time of the clinical worsening of varicose veins of the lower limb;
- (j) inability to obtain appropriate clinical management for varicose veins of the lower limb.

Factors that apply only to material contribution or aggravation

- 6. Paragraphs 5(e) to 5(j) apply only to material contribution to, or aggravation of, varicose veins of the lower limb where the person's varicose veins of the lower limb was suffered or contracted before or during (but not arising out of) the person's relevant service; paragraph 8(1)(e), 9(1)(e) or 70(5)(d) of the Act refers.

Inclusion of Statements of Principles

- 7. In this Statement of Principles if a relevant factor applies and that factor includes an injury or disease in respect of which there is a Statement of Principles then the factors in that last mentioned Statement of Principles apply in accordance with the terms of that Statement of Principles.

Other definitions

- 8. For the purposes of this Statement of Principles:

“death from varicose veins of the lower limb” in relation to a person includes death from a terminal event or condition that was contributed to by the person's varicose veins of the lower limb;

“deep vein draining the affected lower limb” means a vein contained within the deep fascia of the limb or pelvis (such as the veins of the calf pump, popliteal veins, femoral veins and iliac veins), which drains the affected limb;

“ICD-9-CM code” means a number assigned to a particular kind of injury or disease in the Australian Version of The International Classification of Diseases, 9th revision, Clinical Modification (ICD-9-CM), effective date of 1 July 1996, copyrighted by the National Coding

Centre, Faculty of Health Sciences, University of Sydney, NSW, and having ISBN 0 642 24447 2;

“relevant service” means:

- (a) eligible war service (other than operational service); or
- (b) defence service (other than hazardous service);

“terminal event” means the proximate or ultimate cause of death and includes:

- a) pneumonia;
- b) respiratory failure;
- c) cardiac arrest;
- d) circulatory failure; or
- e) cessation of brain function.

Application

9. This Instrument applies to all matters to which section 120B of the Act applies.

Dated this *Thirteenth* day of *October* 1998
